

Vertical Steplift PV-30

Our vertical steplift is perfect for private or public building entrances, specifically when some steps are an architectural barrier for people with impaired mobility or for wheelchair users.

Our elevator versatility allows installation at any indoor or outdoor shaft or space, facilitating the access up to 3 metres in height.

With a simple operation frame, it includes a security system that ensures the correct transport of people with reduced mobility and wheelchair users.

Vertical platforms PV-30 are an inexpensive and efficient alternative to lifts when the travel is not too high.

PV WITH SUPPLEMENTARY WIDE GUIDES INCLUDING BUILT IN POWER UNIT

PV WITHOUT SUPPLEMENTARY GUIDES FOR POWER UNIT

PIT (150mm) + TRAVEL	TOTAL COLUMN HEIGHT
0-500	2620
501-1000	2620
